

5 **Enablers for an Ambitious Coal Phase-out**

 6 **Supplementary Material**

7

 8 **Table S1 – Regions in Integrated Assessment Models.**

 9 The following regional aggregation was used in Figure 1 (B) of the main paper to show the total installed coal  
 10 capacity in China+, India+, North America and Europe region.

 11 List of regional aggregation in IAM used in the ENGAGE project and developed for the LIMITS project. For reference please also see:  
 12 <https://tnccat.iiasa.ac.at/LIMITSDB/dsd?Action=htmlpage&page=about#regiondefs>. Used for Figure 1 in the main paper.

|                |   |
|----------------|---|
| R10NORTH_AM    | countries of North America; primarily the United States of America and Canada   |
|                | Canada, Guam, United States of America  |
| R10EUROPE      | countries of Eastern and Western Europe (i.e., the EU28), can include Turkey  |
|                | Austria, Belgium, Croatia, Denmark, France, Finland, Spain, Sweden, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Switzerland, Turkey, United Kingdom  |
| R10PAC_OECD    | countries of the Pacific OECD   |
|                | Australia, Japan, New Caledonia, New Zealand, Samoa, Solomon Islands, Vanuatu   |
| R10REF_ECON    | countries from the Reforming Economies of Eastern Europe and the Former Soviet Union; primarily Russia  |
|                | Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Republic of Moldova, Russian Federation, Tajikistan, Turkmenistan, Ukraine, Uzbekistan   |
| R10CHINA+      | countries of centrally-planned Asia; primarily China  |
|                | China (incl. Hong Kong), Cambodia, Korea (DPR), Laos (PDR), Mongolia, Viet Nam  |
| R10INDIA+      | countries of South Asia; primarily India  |
|                | India, Afghanistan, Bangladesh, Bhutan, Maldives, Nepal, Pakistan, Sri Lanka,   |
| R10REST_ASIA   | other countries of Asia   |
|                | (in not in India+/China+) Afghanistan, Bangladesh, Bhutan, Fiji, Maldives, Nepal, Pakistan, Sri Lanka, Cambodia, Korea (DPR), Laos (PDR), Mongolia, Viet Nam  |
| R10AFRICA      | countries of Sub-Saharan Africa   |
|                | Angola, Benin, Botswana, British Indian Ocean Territory, Burkina Faso, Burundi, Cameroon, Cape Verde, Central African Republic, Chad, Comoros, Cote d'Ivoire, Congo, Djibouti, Equatorial Guinea, Eritrea, Ethiopia, Gabon, Gambia, Ghana, Guinea, Guinea-Bissau, Kenya, Lesotho, Liberia, Madagascar, Malawi, Mali, Mauritania, Mauritius, Mozambique, Namibia, Niger, Nigeria, Reunion, Rwanda, Sao Tome and Principe, Senegal, Seychelles, Sierra Leone, Somalia, South Africa, Saint Helena, Swaziland, Tanzania, Togo, Uganda, Zaire, Zambia, Zimbabwe |
| R10MIDDLE_EAST | countries of the Middle East; Iran, Iraq, Israel, Saudi Arabia, Qatar, etc.   |
|                | Iraq, Iran (Islamic Republic), Israel, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, United Arab Emirates   |
| R10LATIN_AM    | countries of Latin America and the Caribbean  |
|                | Argentina, Bahamas, Barbados, Belize, Bolivia, Brazil, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, El Salvador, Guadeloupe, Guatemala, Guyana, Haiti, Honduras, Jamaica, Martinique, Mexico, Netherlands Antilles, Nicaragua,   |

|         |  |
|---------|--|
|         | Panama, Paraguay, Peru, Puerto Rico, Suriname, Trinidad and Tobago, Uruguay,<br>Venezuela                |
| R10ROWO | Rest of the World - to be used only if decent match with the 10 regions can<br>otherwise not be achieved |

Table S2 - Dependent Variables.

| Country            | Year peak | Capacity peak | Capacity 2021 | Retired Capacity Total | Retired Capacity Prematurely | Share retired prematurely | Share retired total | Share 2021 as of peak |
|--------------------|-----------|---------------|---------------|------------------------|------------------------------|---------------------------|---------------------|-----------------------|

16

17 Note: This table provides an overview of all variables included in the regression analysis. Peak year indicates  
 18 the year in which a country reached maximum coal capacity and the capacity was not substantially  
 19 increasing in the following years. For countries where coal capacity is still increasing the last observed year  
 20 was included in the analysis. Capacity peak is the capacity in MW in the peak year. As an initial measure we  
 21 thus propose to use the share of prematurely retired coal capacity (coal power plants that are bigger than 100 MW and  
 22 less than 30-years-old) of the total capacity in the peak year, to which we refer as "**premature**." Yet countries might  
 23 retire many power plants prematurely without substantially decreasing their overall coal stock or, in other words,  
 24 without a real trend toward coal phaseout. We thus use **two additional measures** to also account for those trends: (1)  
 25 share of retired coal capacity in total capacity in the peak year (based on the year in which a country reached peak  
 26 capacity; i.e., after which capacity did not substantially increase) which we refer to as "**retired total**" and (2) share of  
 27 peak capacity as a share of the current capacity which we refer to as "**peak versus current**" (calculated to indicate the  
 28 retired share in the current capacity).

29

30 **Tables S3.**

31 A. Regression results with the prematurely retired share of coal capacity as the dependent variable.
