

Table 3. Proposed prioritization of proposed actions in relation to the Triple Dividend of Resilience.

Resilience dividend description	Activity	Up to 2034	Up to 2050	Long-term (up to 2150)
1: avoided losses	excluding the possibility of development in ARFs	+++	+	+
	regular updating of ARFs and appropriate modernisation of planning and protection policies	+	++	++
	limiting chaotic urbanisation, which threatens the city's adaptive potential;	++	++	++
2: economic and development co-benefits	reserving land for alternative public spaces and spa infrastructure	+	++	+++
3: social and environmental co-benefits	bringing the environment up to the required standards.	++	+	+
	limiting chaotic urbanisation, which threatens and cultural identity;	++	+	+
	restructuring urban green areas to make them more drought-resistant	+	++	++
	limiting eutrophication	++	++	++
	cyanobacteria bloom control	++	++	++

Note: Indications of the intensity of the activities:

+++ – strongest,

++ – moderate,

+ – constant activities, the intensity of which does not need to be concentrated in time.
